

AUCTF 2020

Reversing : Mobile0

Description : Hey, look its an android file. Can you find the flag?

Attachment : mobile0.apk

Solutions :

Using strings combined to grep to find content with “auctf” inside the “mobile0.apk” and we find the flag.

```
bash: strings: command not found
kali@kali:~/Downloads/AUCTF-2020-master/Reversing/mobile0$ strings mobile0.apk | grep "auctf"
auctf{m0b1le_r3v3rs1ng!!}
```

Flag : **auctf{m0b1le_r3v3rs1ng!!}**
