

NeverLAN CTF

Web : SQL Breaker

Value : 50 pts

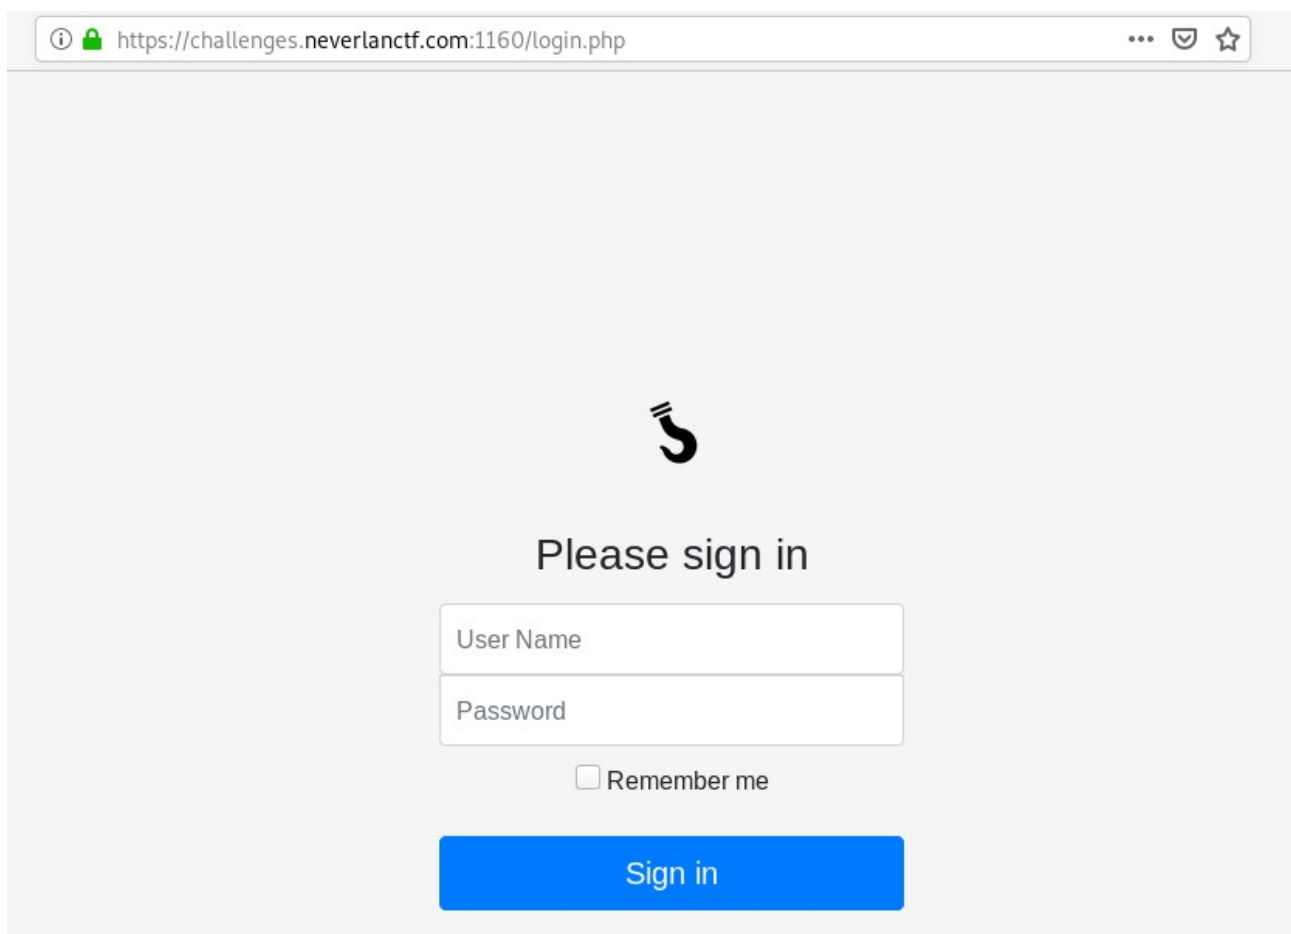

Difficulty : Easy

Description : Your flag will be in the normal flag{flagGoesHere} syntax.

Attachment : <https://challenges.neverlanctf.com:1160/>

Solution :

On the website, there is a login page that sounds interesting.

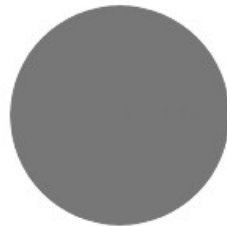

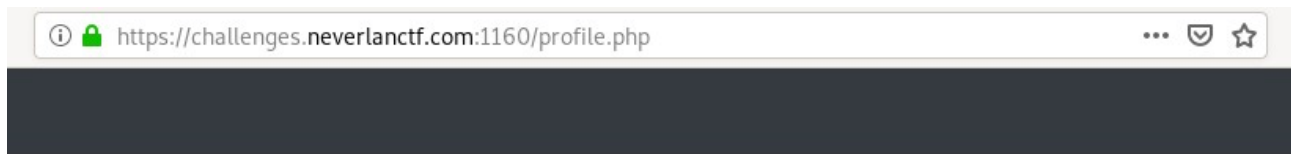

The screenshot shows a web browser window with the address bar displaying <https://challenges.neverlanctf.com:1160/login.php>. The page has a light gray background and features the NeverLAN CTF logo at the top center. Below the logo, the text "Please sign in" is displayed. Underneath, there are two input fields: "User Name" and "Password". Below the "Password" field is a checkbox labeled "Remember me". At the bottom of the form is a blue button labeled "Sign in".

To bypass the authentication, we can try a basic SQL Injection. The injection in the username field

' or 1=1;-- -

is successful and gives us the admin account!

Welcome, Admin
