

Cryptography : Crypto0x0004

Value : 150 Pts

Description : Mr. World wide

Attachment : chall4.jpg

Solutions :

We got this cipher to decode.

Searching on google about “**flag cipher**” and I find the **Navy Signal Flags Decoder**.

Source : <https://www.dcode.fr/maritime-signals-code>

Decoding the cipher and we get the flag.

The screenshot shows the "NAVY SIGNAL FLAGS DECODER" interface. On the left, a "Results" section displays the decoded message "RIFTCTFJUSTA7R1BUT3T0ARMEDFORCES" in a red box. Below this is a dark green area with the "vaudoise 125" logo and the word "Assicurazioni". On the right, the decoder interface includes a grid of 24 nautical signal flags, a section for "NAUTICAL CODED MESSAGE WITH FLAGS" showing the input sequence, and a "DECRYPT" button at the bottom right.

Flag : **rifTCTF{just_a_7ribut3_t0_armed_forces}**
