Cryptography : Crypto 0x0002

Value : **200 Pts**

Description : Enjoying the party? Let's not forget our sponsors, who made all this possible.
A special thanks to http://bit.ly/l4stnam3 .

Alright now let's see the juicier stuff.

egkyGGJ{Q3e_Xf_FshH3wf} -- you know what to do right?
make sure you have the key ;)

Solutions :

Reading the description give us few interesting information, they mention there sponsor with a **bit.ly** link and we can notice the "**l4stnam3**" part of the link.

Then they give us the cipher and they said "**make sure you have the key**", the cipher look like **vigenere cipher** which need a **key** too.

Clicking on the link and we are redirected to the sponsor **linkedin** profil, trying his **last name** as key inside a **vigenere cipher decoder**, and decoding the cipher return us the flag.
