Recon : Front Page of the Internet

Value : 50 pts

Difficulty : Easy

Description : Your flag will be in the normal flag{flagGoesHere} syntax.
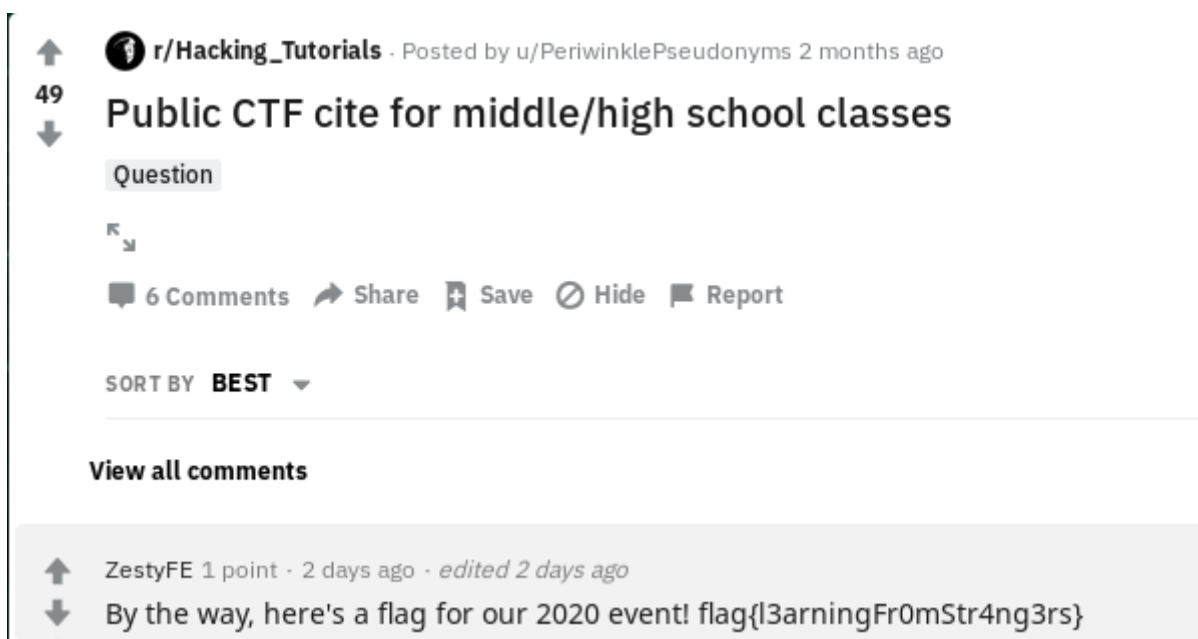

Attachment : Whoops... I leaked a flag on a public website

Solution :

For this recon challenge, it seems that the flag is on a public website. The title of the challenge makes a clear reference to Reddit. That's where the researchs will start.

Searching 'flag' on Reddit don't lead to anything. But maybe the author has the same username on Reddit and on Neverlan!

There is a ZestyFE user on Reddit, and looking on his last comments we can see the flag.

flag{l3arningFr0mStr4ng3rs}
