Crypto : Keysar

Description : Hey! My friend sent me a message... He said encrypted it with the key
ANGSTROMCTF.
He mumbled what cipher he used, but I think I have a clue.

Gotta go though, I have history homework!!

agqr{yue_stdcgciup_padas}

Solution :

Here we get a cipher text to decode with the key "**ANGSTROMCTF**". As the name of the challenge is
"**Keysar**" I directly think of "**Caesar Keyed Cipher**".

Going to an online decoder and decode the cipher.
